

We have also learned about Burlington's public utility commission and the UVM commission and how they are deciding to which colleges the RECs will be assigned. We have worked with both organizations outside of class to achieve our goal.

At the end of this semester, we hope to all have a healthy understanding of how RECs and RINs are produced, as well as the legal steps necessary to legitimize them. In doing so, we hope to officially declare several RSEN buildings as net zero energy!
