EXPERIMENT MANAGEMENT SYSTEM

Participant Documentation Set – UVM

Version 2.76

PARTICIPANT (STUDENT) DOCUMENTATION

Introduction

The Experiment Management System provides an easy method for you to sign up for studies, and track your progress throughout the term. Everything is done through the software's web-based interface, so you can access the system at any time, from any computer, with a standard web browser.

It should be noted that this documentation covers all the features in the system, but your organization may have chosen to disable certain features. Do not be alarmed if the documentation covers options and features that are not visible on the system you are using.

Getting Started

Your interaction with the system will be minimal and hopefully as painless as possible. After you log in to the system, you can view a list of available studies and any restrictions, sign up for studies that interest you, and track your progress throughout the semester. The system will track when you receive credits for a study, so you can view this online as well.

The system works best if you use any popular web browser that is less than 2 years old, like Internet Explorer, Firefox, Safari, and Chrome. It will work with other web browsers, and with older versions of popular web browsers, however the layout may not be as clean. No functionality will be lost by using an older web browser. The software will work if you are using a screen reader or other tools for those hard of hearing or sight.

This documentation assumes you have a basic knowledge of how to use the web. On this system, it is not necessary to use the Back button. You can always use the toolbar on the top of every
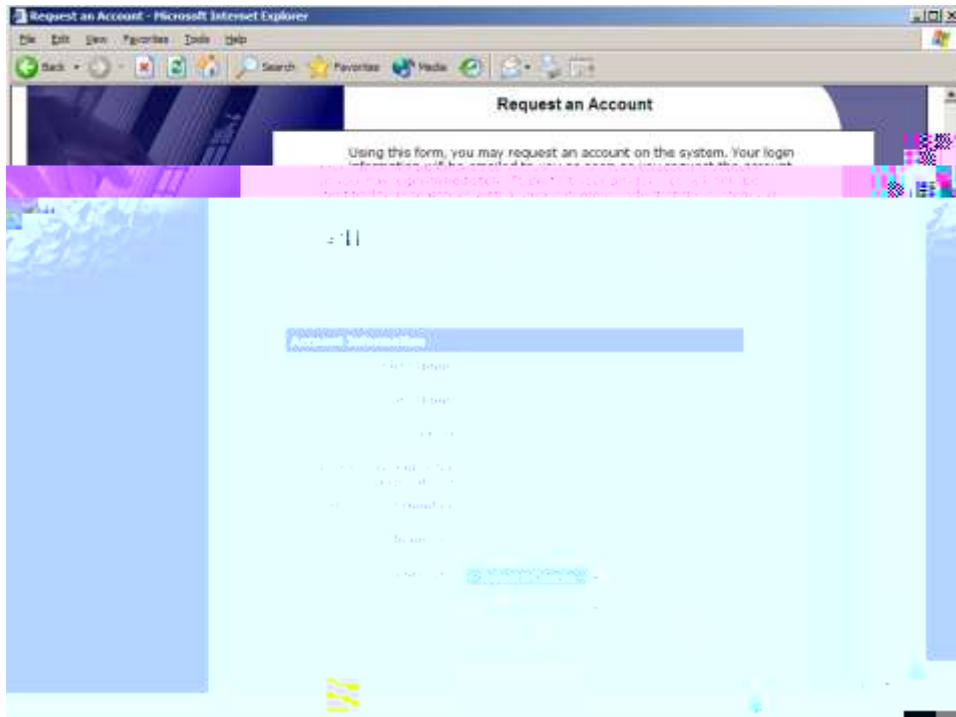

Figure 1 - Requesting an Account

If you did not receive your login information, please check your email program's junk mail folder before contacting the administrator. The most common reason for not receiving login information is that an email program misclassified the email as junk mail.

Logging In

Once you have your login information, go to the front page of the site and enter your user ID and password to log in.

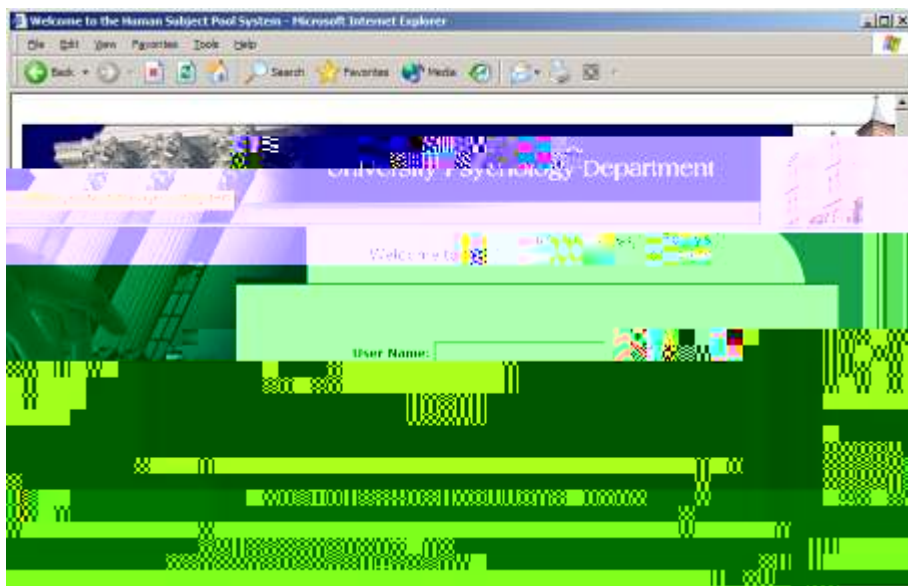

Figure 2 - Login Page

Once you log in, you may be asked to review and acknowledge your organization's human subject policy for research. You will need to acknowledge this only once every 6 months. After you complete this task, you will see the Main Menu.

Figure 3 - Main Menu

Your login (also known as a session) will expire after a certain period of inactivity, usually 20 minutes. This is done for security purposes. If this happens, you can always log in again. When you are done using the system, it is better to explicitly log out, to prevent any problems that may arise if someone uses your computer before the session expires. This is especially important if you are using a public computer lab.

Retrieving a Lost Password

If you have forgotten or do not have your password, and the feature is enabled on the system, then you may choose to have your password emailed to you. You will see an option on the front login page if this feature is enabled. Your password will be emailed after you submit the form, and should arrive in your email box momentarily.

Logging Out

When you are done using the system, choose Log Out from the toolbar on the left side to log out. You are now logged out. It is always a good security measure to close all your browser windows as well, especially if you are using a computer that is shared by others.

Changing Your Password and Other Information

If you would like to change your password or other information about yourself, choose My Profile from the top toolbar. If you would like to change your password (and the option is

enabled), type your new password (twice, for confirmation) in the provided boxes. If you would *not* like to change your password, simply leave these boxes empty.

If you change your password, please be sure to select a password you do not use on any other systems or websites. This is good computing practice, and especially important as in some cases, your password may be sent over email.

Figure 4 - Updating Your Profile

Email Address Options

There are certain events in the system which will cause an email notification to be sent to you. Most often, these are notifications that you have received credit for a study, or a confirmation that you have signed up for a study. If Unique ID codes are *not* enabled (see Unique ID codes), your email address is also displayed to the researcher when they view who has signed up for their study, in the event they need to contact you.

You have two choices for your email address. When you update your profile, you will see a box where you may provide an alternate email address. If you provide such an address (this could be a Hotmail account, for instance), this is the address where any notifications will be sent, and this is also the address that will be displayed to researchers (if enabled).

In situations where the system is configured so you may enter an email address on this page, you will be asked to enter it twice when changing the address, to ensure it is typed correctly.

In some cases, depending on how the system is configured, you will be required to provide an email address (which will be listed as "Email Address" instead of "Alternate Email Address") and all emails to you will go to that address.

Changing Courses

Depending on how the system is configured, you may see an option to change which courses you are

Studies that currently have available participation times (timeslots) will have "TIMESLOTS AVAILABLE" listed next to the name of the study. If no studies have available timeslots, you may want to logon to the system a few days later to see if new timeslots have been added. You may also select a specific date to view studies with available timeslots on that date.

To view more information about a study, click on the name of the study.

Two-Part Studies

Some studies are two-part studies, where you must sign up for both parts of the study at once, and the two parts must be scheduled a certain number of days apart. These studies will be clearly marked, and the system will ensure you are only able to sign up for timeslots with the appropriate amount of time between the first and second part.

Online Survey Studies

Some studies may be online survey studies that are administered in the system. If you sign up for one of these studies, you will be taken immediately to the survey. As soon as you complete the survey, you will receive credit.

You may withdraw from the survey at any time, by clicking the Withdraw button on the top right corner of the screen. When you withdraw, you have an option to withdraw without the chance to receive credit, or with the chance to receive credit. The difference is that if you withdraw without the chance to receive credit, then your sign-up will be completely deleted from the system. This is useful if you simply changed your mind about participating in the survey, but might like to participate in it again at a later time.

If you choose to withdraw with the option to receive credit, then your sign-up will be logged and the researcher will be notified of the withdrawal, but you will not be granted credit immediately. The researcher may then choose to grant credit to you for your participation in the study. If this is done, you will not have the opportunity to participate in this study again (because you may not participate or receive credit for the same online survey study more than once). With this withdrawal option, you are not obligated to provide any explanation of why you are choosing to withdraw, but you may provide an explanation if you like, and this information will be sent to the researcher when they are notified of your withdrawal.

With either withdrawal option, all the survey responses you provided are permanently deleted at the time you withdraw.

Signing Up For Studies

To sign up to participate in a study, find the study you would like to participate in (see Viewing Studies in this documentation). Click on the study name for more information. You will see a list of any special restrictions or eligibility requirements, as well as a contact person if you have questions about the study. If the study has a principal investigator listed, you can click their name to view full contact details. In most cases, it is preferred to contact the person listed as the researcher if you have specific questions.

Some restrictions are automatically enforced by the system. If the study has certain pre-requisites or disqualifiers (studies you must *not* have participated in to participate in this study), those may be listed, as well as a note about whether you meet those eligibility requirements. If you have signed up for a study with another study listed as a disqualifier study, then you will be prevented from signing up for the other study, since it is a disqualifier for a study you are currently signed up for.

Figure 6 - Study Information

The study may have other restrictions listed as Eligibility Requirements. An example of an
Figure 7 - Study Timeslots

Once you have determined you meet all the requirements, click on View Timeslots for This Study and you will see a list of available timeslots. Choose a timeslot that is convenient for you, and click Sign Up.
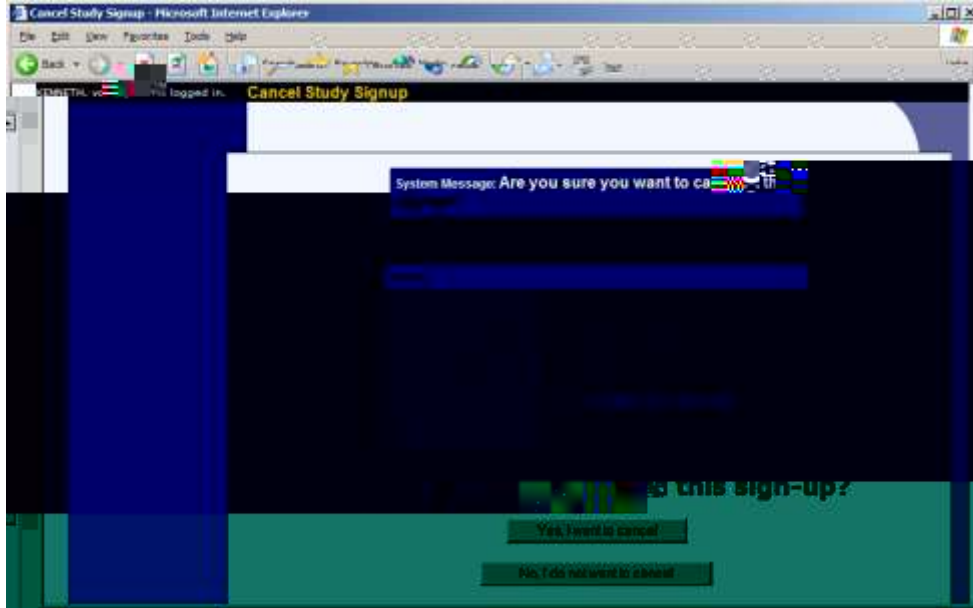

Figure 8 - Sign-Up Cancellation

Once you click Cancel to cancel your sign-up, you will see a confirmation page. You will also be warned if your cancellation might affect your ability to participate in other studies you have signed up for, due to pre-requisite restrictions. If the cancellation will affect your ability to participate in another study you are signed up for, it is *your* responsibility to deal with this issue (usually by canceling the dependent study as well). The system will warn you, but will not block the cancellation.

Click Yes to cancel your sign-up, and the sign-up will be cancelled immediately.

If you cancel the first part of a two-part study, the second part will also be cancelled. If you cancel the second part of a two-part study, the first part will *not* be cancelled, but you will need to ask the researcher to sign you up for the second part again, if you would like to participate in it at a later date.

Tracking Your Progress

You may track your progress at any time by choosing the My Schedule/Credits option from the top toolbar.

When you view this page, you will see at the top a list of the number of credits you are expected to earn, and how many you have earned so far. You may also have an option to view how many credits you have earned for each course. Below that, if you have signed up for any studies, those are listed as well. In the list of studies, you will see information about your credit status.
Figure 9 - Viewing Your Progress

Next to each credit, you can also see any comments the researcher left regarding the study and your credit for it. In cases where the study was set up for monetary compensation and not credits, your participation will be noted as "participated." This is done to ensure your eligibility for any studies where the study you just completed is a pre-requisite study.

Non-study credit is also listed, when applicable. Non-study credit is usually granted for writing a paper or some other special situation. .0052>1 725(ou be)4(lon)-11(g)10(to m)-3(ul0 0 1 9[N 80510003005A00·

It is possible that older records of your participation are in the system, but not displayed. If that is the case, you'll see an option to view the older records as well.
