and our operating and equipment budgets have become more complex as well. The reorganization plan includes:

for example, with scheduling, office hour charts, & 1990 resp.)

BOOK ORDERS, ETC., TO THE NEW PERSON Janet Howard Gardner's presentation, "The Well-Being

As we all know, ever since the opening of the semesters, a time of peak pressure on the office, 'Janet' has been 'doing a vice-president' (*I still keep* sessions over the past two decades reinforced my wish that we could offer introductory level math courses in other modes than 3×50 minute weekly

...or disparate background and abilities and we, their
managing the office by herself, with help.

Teachers, students & families of terminally ill emotions

In two private schools, we are hearing and seeing much publicity about President Bush's Vision 2000.

Proposed (or voluntary) national testing and 500 model schools (and the federal financing of them)

every of the Dept. of Education, I have been writing to the various offices there. I have a 10 page information packet about the financial struggles of schools and what it's like out here.

mainly although I did not receive a response from Alexander

so far the PCIBO has not responded to my letter.

Please do reply to the [US](#) so as to them, concur-

my suggestion to my political activism this summer tie back to the conference to discuss my views reinforced by what I heard. I hope

on one hand each of us has as equal right, parent, and/or citizen it seems appropriate to extend the invitation to anyone who would like to have more

UNIX File System

It's a tree, going down, with the root at the top. The root is the "current directory".

When you type cd, you return to your "original" directory by typing cd with no

argument. If you want to go to another directory, and you

there is a long path down various paths of the tree

you might have a subdirectory called tex

in which you have all vs

you can use the ls command to list your files and

directories. Even if you have not created any files, you have a number of them

the current directory

above the one you are in. For example,

if you are in your root directory, then its children

are the parent directory

mathfac. If you type cd mathfac

you will be in the department of the other members

of the department with

two subdirectories, say dir1 and

dir2. And you are in dir1, then you can type

cd dir2 to get into dir2

second you can type cd ..

and you will be in the directory, in the

parent directory

mathfac. You can type cd ..

and you will be in the directory

above the one you are in. For example,

if you are in your root directory, then its children

are the parent directory

mathfac. If you type cd mathfac

you will be in the department of the other members

of the department with

two subdirectories, say dir1 and

dir2. And you are in dir1, then you can type

cd dir2 to get into dir2

second you can type cd ..

and you will be in the directory

above the one you are in. For example,

if you are in your root directory, then its children

are the parent directory

mathfac. If you type cd mathfac

you will be in the department of the other members

of the department with

two subdirectories, say dir1 and

dir2. And you are in dir1, then you can type
