

Specific traps for each pest were set out and brought back to the UVM Plant Diagnostic Clinic to be examined on a 14 day schedule from June through September, 2020. Traps were changed at appropriate times as dictated by pest and trap. All survey activity followed the approved method and survey guidelines for pest surveillance in the CAPS Pest Data <https://pest.ceris.purdue.edu>.

Results None of the pests listed were found at any of the 10 sites in 7 counties on any date (greenhouse or field tomatoes)

Tomato farms surveyed, summer 2020
