Final Exam: 150 points

#) #' & 1000 points

L+, ' 0! 1' I& You are not required to take the Final Exam. You will have the option to select the average of the three in-class exams as your Final Exam grade.

!"#\$%&!& In order to learn the lecture material, one must work problems. To help you with this task, I will periodically hand out problem sets. The problem sets will not be graded, but I will collect them and make a note of the amount of effort expended on them and use that as a means of deciding borderline cases when assigning final grades.

For each problem set, I will prepare and hand out a detailed answer sheet. Please work through the problem set *before* looking at the answer sheet. If a particular problem is stumping you, move on to another one and go back to it later. If you still can't work the problem, follow through the solution on the answer sheet. Then, without checking the answer sheet, re-do the problem. Do this until you can solve all of the problems without looking at the answer sheet. Please feel free to work with others when working problems, but remember that you will be required to solve similar problems by yourself when you take the exams.

' (%) #' #) %* & Practical quantitative analysis is a skill that is acquired only via meticulous practice in the lab.
