

**HP 306A ARCHITECTURAL CONSERVATION I (10718)**

The main goal of this course is to provide an overview of the study of architectural conservation through an examination of historic uses and physical properties and science of common historic building materials and finishes. We will explore the composition and pathology of building materials and examine strategies for conservation treatments and rehabilitation.

We recognize that the professional preservationist should have a broad understanding of basic analytical and research skills, including a knowledge of historic construction techniques and the abilities:
