

Stop Things From Going Wrong: Avoiding a Crisis Before it Happens

Bill Bamka

Steve Komar NJAES Cooperative Extension

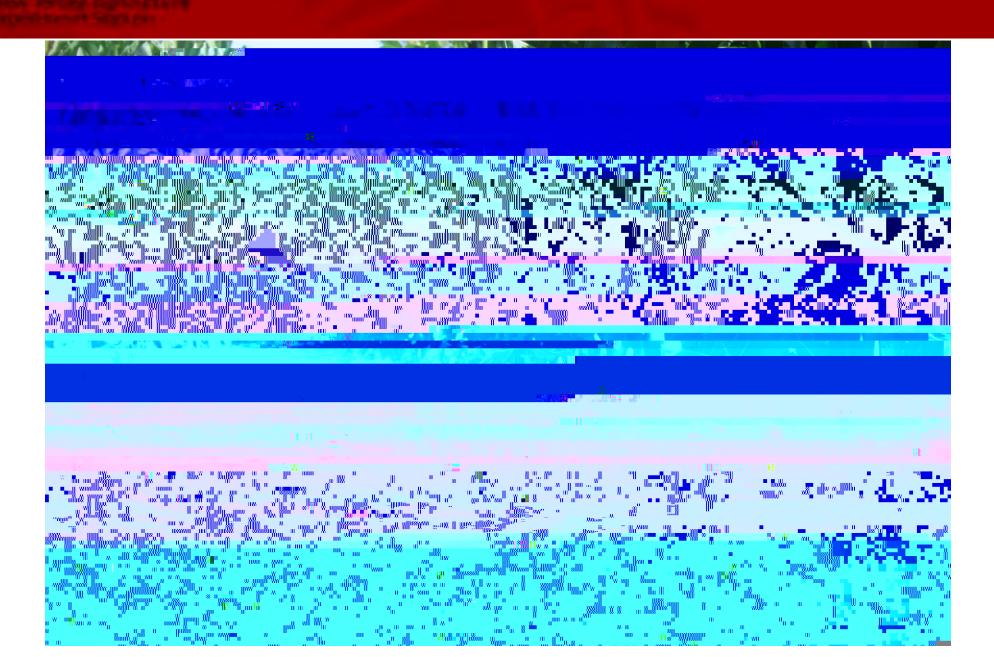

Safety vs. Emergency Preparedness

Safety Preparations

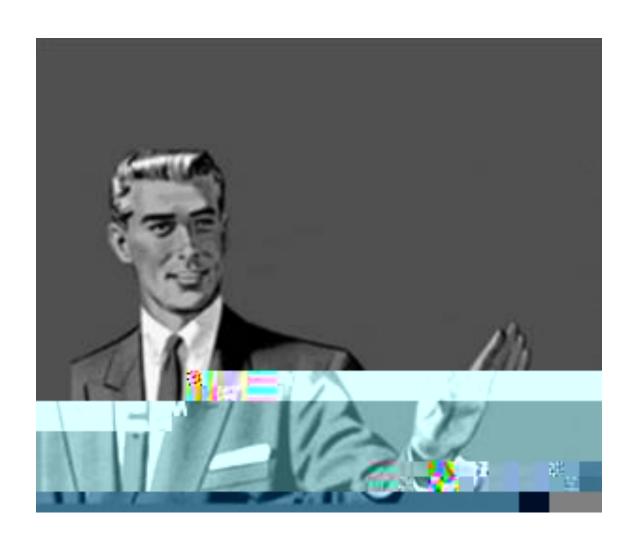

- Putting in fire control systems
- Making, communicating and enforcing rules
- Eliminating potential slip, trip, fall hazards
- Checklists for employees to use in getting ready for the day

•

RITTER

Stop Worrying

What could go wrong?

Triple A

ANYTIME

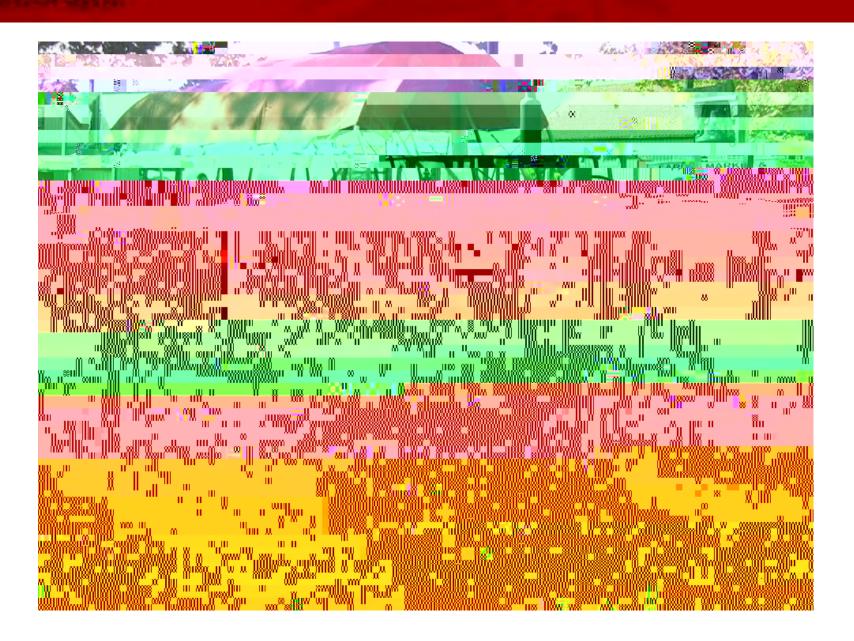

ANYWHERE

ANYONE

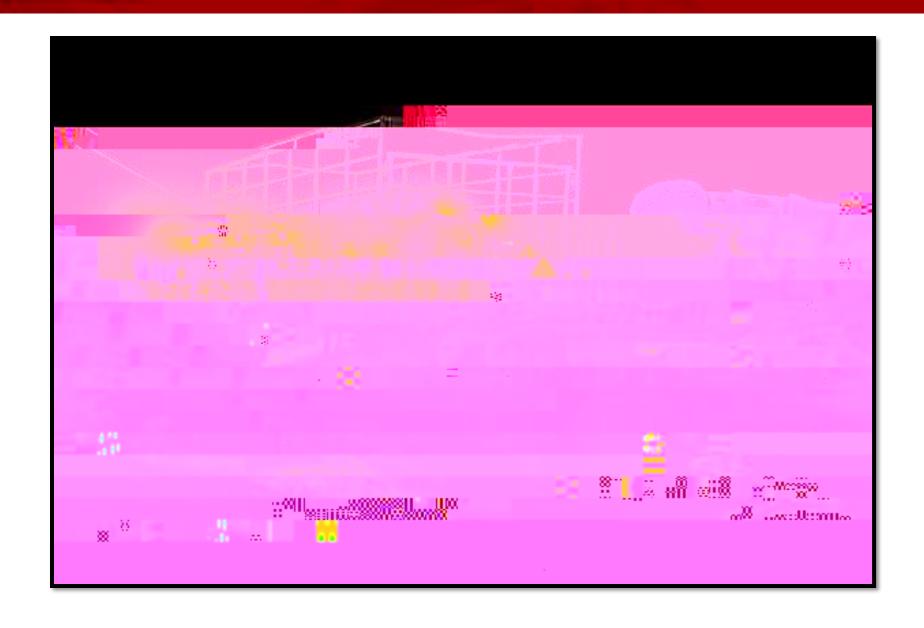

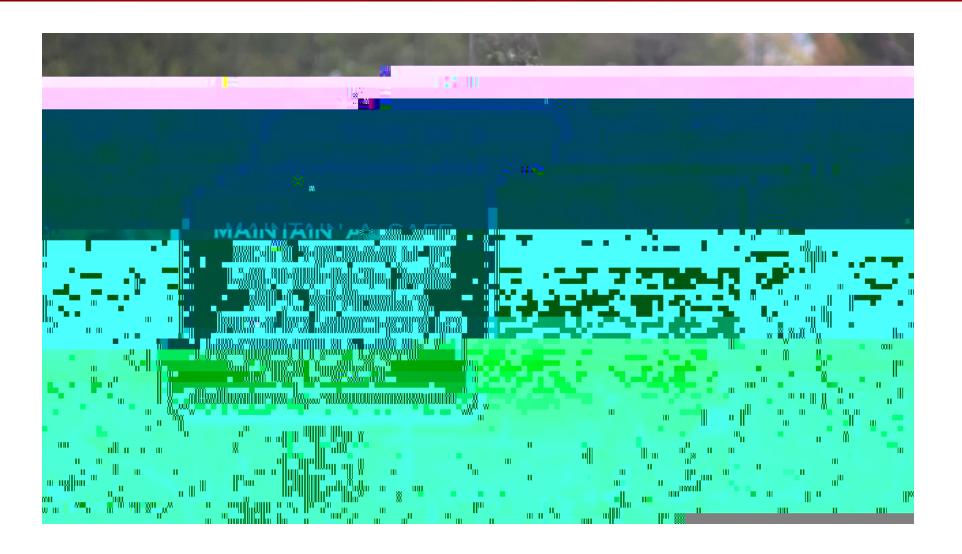

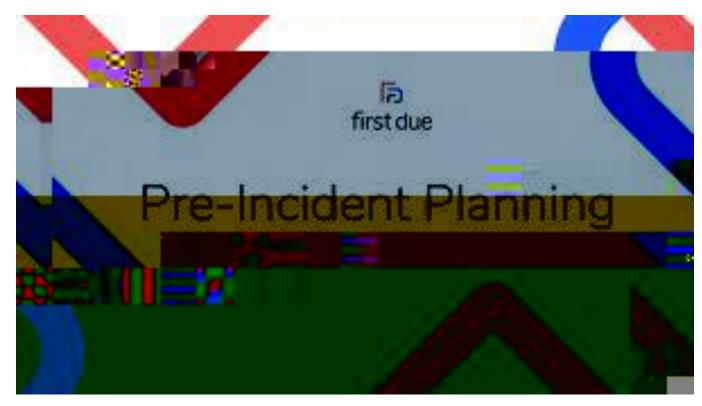

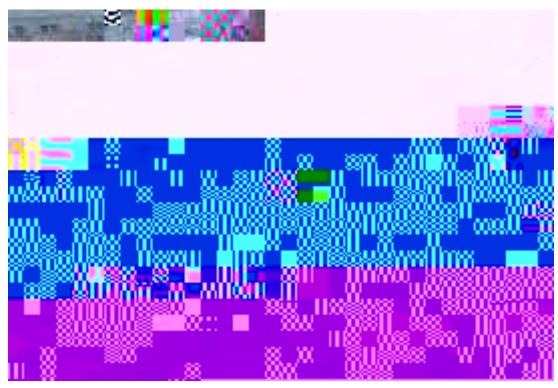

- Proper
- Planning
- Prevents
- Poor
- Performance

Reduce Risk

- Most important step in risk management is making sure accidents don't happen in the first place
- Things that can be done to minimize hazards
 - Training staff
 - Reconfiguring public areas
 - Adding safety features
 - Increase customer awareness of specific hazards

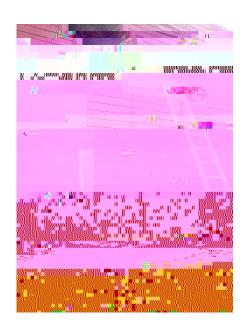

•	•	
•		
•	•	

- { Animal safety
- { Emergency response and liability
- { Employee management
- { Food safety
- { General farm safety
- { Hayride safety
- { Parking and traffic assessment
- { Marketing assessments
- { Handling and recording incidents

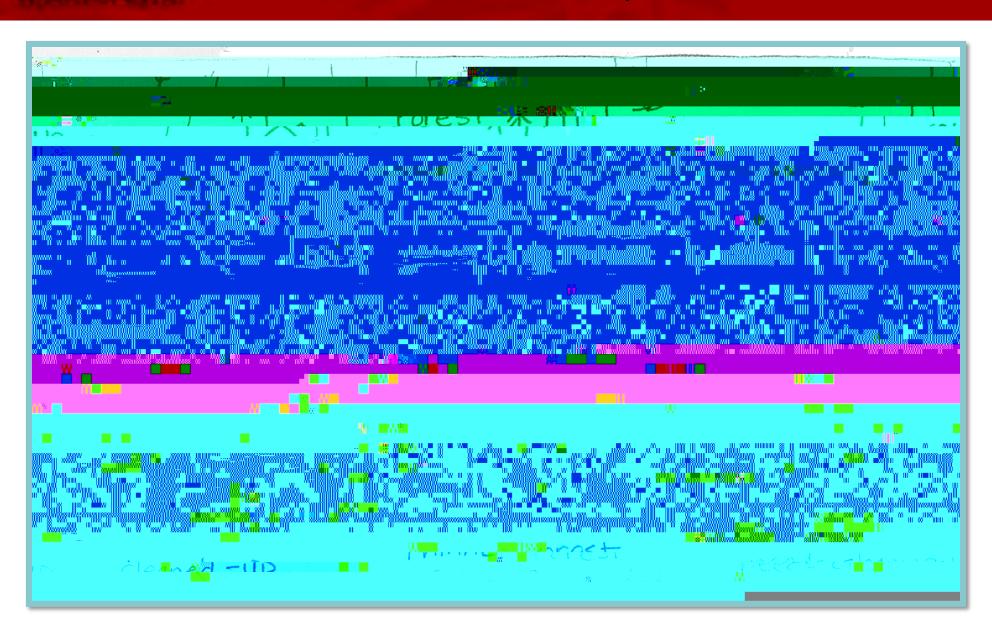

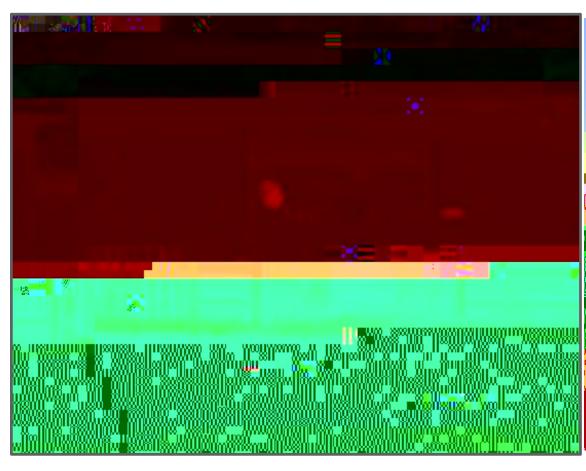

The process

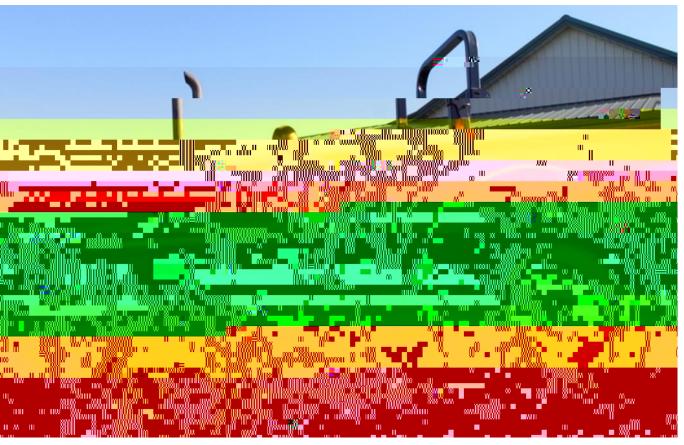

- { Inspect your farm, preferably with two sets of eyes thelps identify all hazards
- { Evaluate and set priorities
- { Determine the most cost-effective corrective action
- { Set a deadline for completion
- { Implement corrective actions treevaluate you have not caused another problem
- { Repeat inspections monthly tevaluate progress and identify new hazards
