## Announcement

### NASA-funded Research Experience for Undergraduates

Released: January 8, 2024

announce the Research Experience for Undergraduates (REU) program. Awards are competitive and intended to support a substantive research effort conducted by an undergraduate student mentored by a faculty adviser in an area aligned with NASA priorities. The expectation is that the research will lead to a clear and substantial academic accomplishment resulting from significant student effort. The goals of this program are twofold: (1) to help prepare the next generation of researchers in STEM disciplines; and (2) to provide the undergraduate student with research experience that strongly aligns with NASA priorities. The VTSGC expects to make awards under this program for the 2024-2025 academic year.

**ELIGIBILITY:** Pursuant to NASA requirements for the National Space Grant Program, undergraduate students funded by this competition must be U.S. citizens and enrolled in an undergraduate program within a STEM discipline at a Vermont college or university. Faculty members serving as research mentors will be full-time faculty in STEM disciplines. All eligible applicants will receive consideration without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other category legally protected by federal or state law. The VTSGC encourages applications from all individuals who will contribute to the diversity and excellence of the program.

**AMOUNT AND PERIOD OF SUPPORT:** Subject to the timely arrival of NASA annual funding installments, these awards will provide a stipend of \$6,000 for a maximum of 10 weeks anticipated to span from June 2024 to May 2025. The award also includes up to \$1,000 for research-related travel. Awards will be made directly to the student as a stipend for the student's research time, not funds for materials or other costs.

**APPLICATION:** The application for a VTSGC REU award shall be written by the student with collaborative support from a faculty mentor. The completed application packet must be typed on a single (8.5-by-11-inch page, easily readable 12-point font, 1-inch margins) and include the following items:

- x Signed Cover Page. Use the form included with this announcement.
- x Project Narrative (limit of 2 pages, exclusive of citations). A narrative providing a description of the project, its significance, methods and expected outcomes. Please be specific about what research activities or tasks the student will undertake
- x NASA Relevance (limit of one half page). Describe how the proposed project is aligned with a new or continuing NASA research priority or technical need. For example, the applicant may cite a current or pending NASA Research Announcement from the Mission Directorate the research will be targeting (NASA Mission Directorates can be found at <https://sti.nasa.gov/nasa/programsanddirectorates/>.)
- x Student Resume (limit of 2 pages).
- x Student Academic Transcript. An unofficial transcript is acceptable.

**INSTITUTIONAL AUTHORIZATION:** All applications must be approved by an authorizing official at the institution of origin. University of Vermont (UVM) applicants must coordinate with their departmental representative from Sponsored Project Administration (SPA) and route applications through UVMClick. All other applicants must coordinate with the SPA equivalent at their institution. For assistance with this requirement, please contact your faculty advisor or the VTSGC office.

**ELECTRONIC APPLICATION PROCEDURE:** All applications must be submitted electronically to the Space Grant Office. The electronic submission must be made no later than 11:59PM on April 4, 2024. The application must be saved as a single PDF file and emailed to the Space Grant Office at [SG.Director@uvm.edu](mailto:SG.Director@uvm.edu) with the subject line "NASA REApplication." Incomplete proposals will not receive consideration.
